HOME AND FARM

'Drought Proof Grass." Entron St. Locate Republican: In "drought proof grass." Having in the past been "bitten" by a man of the same name, I desire to give my experience so that my brother farmers may avoid the pit into which I feil. In the spring of 1882 I saw in the South and West, of St. Louis, a communication worded almost executy as in the one referred to above, and extolling in terms of high praise a grass to which the writer ascribed the name qualities as are now given to his "drought proof grass," but which was then called "Japan clover. Beshe same qualities as are now given to his "drought proof grass," but which was then called Japan clover. Becoming interested in the matter I wrote. Mr. Walker regarding the grass and received in reply a price list quoting the sead at \$5 per bushel. Several letters passed between us and the result of our correspondence was that I seat for \$7 worth of seed. Time passed on and I one shy received a notice that a box awaited me at the express office in Windsor. I immediately west after it and found that the express charges were for which is plaid overjayed to receive my seed so promptly; but my surprise can be better imagined than described, when, upon arrifing at home I opened my hon and found that it contained, instead of the wonderful seed, which I had so confidently expected to revolutionize the graxing fusiness of our country, a poor article of North Carolina sand. I wrote the gentleman at once, but have never heared a word from him. Further comment is not necessary. I sincerely trust that all your readers will profit by my costly experience, and not buy smal at a cost of \$14 per bushel. Respectfully, was a good model for an artist, por feet to the eye, yet, it will not excite the second of sixt being the cultivation of the mind and the as the cultivation of the mind and that and the matter I wrote his judicious reading of property sets by the judicious reading of property sets be dead to be fully indicious reading of property sets be dead hooks. Even as ascuiptor gives ture to repair this deficiency and effects of reading and officially and officials. In some many tours reading and attractiveness to the contenance, and attractiveness to the contenance, and attractiveness to the contenance, and attractiveness to the contenance.

To the conductor: Self the same to a cost of \$14 per bushel. Respectfully, W. A. Gannerr. Windsor, Henry Co., Mo.

COPPREVILLE, Miss., July 18, 1884. EDITOR CLARION: In your issue of the lich, I noticed an article on "Per rennial Grasses," purporting to be from . J. W. Waller, Franklinton, N. C., and a the St. Louis Republican, of the 11th

Walker sent the Japan clover seed, which can or is only secured by raking up the seed in ebbings of sand on the margin of ditches and marshes, which not be deceived.

Harvard Sausage for Athletes.

In Dr. Sargant's recent lecture on "What Shall We Do to Get Strong?" he said in the course of his remarks: "It has been customary to train athin the St. Louis Republican, of the 11th inst., I notice the enclosed clipping, which you can take for what you consider its worth. If this man is an imposter his name should be heralded promptly throughout the land, as many innocent people are liable to be subjects of his frauds, in this day of excitement on grasses. I merely enclose this statement, thinking it might escape your notice, etc., and your patrons might be descived before you could warn them.

Truly yours, J. No. K. Cotalina.

P. S.—After reflecting upon the two statements, I conclude that maybe Mr. Walker sent the Japan clover seed, which you can strike a wint of his frauds. The propose of his remarks: be four hours late reaching its destination.

To travelers, especially from "the cultured East" to "the rowdy West": Act as if you owned the car from the start. Your superior breeding will thus be established, and no one will question it thereafter. Talk loudly, especially about the private and personal affairs of absent and unknown people. Be sure to use slang so as to escape the suspicion of being intellectual dudes. Monopolize the toiletrooms. Give orders to the conductor and porter in such style as will demonstrate that the emancipation proclamaendurance. A man who can strike a blow equal to four hundred pounds would be called a strong man, but this strength can not be kept up for any length of time on animal food, as it comes from the base of the brain, and would in appearance, perhaps, look length of time on animal food, as it more like sand, than grass seed. If his letter refers to Japan clover seed, it should be so stared, that people might in the second to the s of a man in training lean meats may do, but when he is down in weight he carbon, such as ham and sausages, which should always be eaten cold. Three years ago this would be considered ridiculous by trainers, but for a A GENERAL feeling prevails among it has been found that succharine food, wire fencing. And Western wire fencing. And Western men, per coffee and alcohol, as well as condiments, are objectionable; indeed, it is West," and you will add inestimably As a bird on the farm the balance of evidence stands against the crow. Put a fat worm and a fat kernel of corn be-
